Side guide

Side guides are used for reliably guiding the product on roller conveyors and belt conveyors, as well as on the corresponding components. We offer the side guides in an aluminum and a polymer version. In particular, because of the flexible material, the guides can be adjusted to the material flow in curves, as well as when merging and diverting.

Designation	Dimensions	Reference number
Aluminum side guide	40 x 15 x 2000 mm	63133351
Polymer side guide	40 x 15 x 2000 mm	63010049

Side guide holder

The side guide profile is attached to the universal support with the side guide holder.

Designation	Dimensions	Reference number
Side guide holder	46 x 28 x 22 mm	63010248

Side guide connector

Side guides are connected to each other at the transition of two modules with the side guide connector.

Designation	Dimensions	Reference number
Side guide connector	70 x 28 mm	63010050

End cap for side guide profile

An end cap is attached to the end of a side guide. The contour prevents products from being caught.

Designation	Dimensions	Reference number
End cap for side guide profile	100 x 40 x 40 mm	63010039
