REACH – Information
in accordance with Regulation No. 1907/2006/EC
for Registration, Evaluation, Authorisation and
Restriction of Chemicals (REACH)

The producer/supplier
Interroll Trommelmotoren GmbH
Opelstrasse 3, 41836 Hückelhoven, Germany

hereby declares that we comply with all
obligations under the REACH Regulation,
including all information obligations in the supply
chain and provide the necessary materials.

Information obligations under Article 33.1.
REACH
As a supplier of articles, we are obliged to provide
information if a so-called candidate substance
(substance of very high concern (svhc)) is
present in a concentration of more then 0,1 % by
mass in our article or in an article used in our
article.

We are in constant dialogue and exchange of
information with our suppliers, especially when
expanding the candidate list, and take into account
the interpretation of the ECJ judgment C-106/14
with regard to the reference value of 0,1%: ECJ
106-14.

In June 2018.
Lead metal (CAS No. 7439-92-1) is included
in the REACH candidate list.

The inclusion in the candidate list is not based
on new scientific knowledge but serves to
collect further information on lead, e.g. on the
amount of metal used in the EU.

Lead is still an important element for various
alloys. It is not without reason that the lead
content for steel, aluminium or cooper alloys
is permitted in the RoHS Directives
2011/65/EU and 2015/863/EU in various
exceptions up to 4%.

We are nevertheless obliged to pass on to our
customers the information available to us on
the use of lead >0.1% in some copper and
aluminium parts in some of our products.

Products subject to this information obligation
are listed in the annexed list.

Dr. Hauke Tisdemann
Managing Director Interroll Trommelmotoren GmbH
Hückelhoven, 01.05.2019
The following Interroll products are subject to the duty of information due to the use of lead >0.1% in the aluminium parts and copper alloys:

- I-Motor
- S-Motor
- D-Motor
- DM-Motor
- PD-Palet Drive
